It's hard to believe that I am actually writing a BLOG! It's been my experience  
og is a page that Locks up your Browser for twenty minuets while it loads Hund  
hotos, graphics and videos . Bloggers don't seem to care much about browser s  
ours or optimised graphics. they must think it loads fast because it is always ca  
n their machine :-P At any rate it seems a necessary measure to insure good  
ngine placement due to Content versus Key words like t-shirt. When I started t  
e it was just something to do that wasn't a project for a client or family member  
d a site that would educate the masses of people thinking they would get rich q  
h t-shirts, about all the options available for imaging garments. So many Blog  
re using t-shirts to promote their sites, And dot org's are using them as reward  
nating as well as the Promotional aspects. With the growing number of t-shirt w  
es talking about the Imprinted apparel industry as well as the number of Desig  
wn t-shirts and Web store front t-shirt sites, People seem to be a little lost as  
at and why of Silk Screen printing, t-shirt transfers and Direct digital prints. H  
been in the Imprinted apparel Industry now for over twenty years, I find it nuts  
ople would pay such Crazy prices for shirts Just so they could Select and arran  
Crappie cheesy clip art all by themselves! Well they like to do that in Word too  
t's a Blog of it's own :-P Event shirts or Company uniforms reflect the organis  
hey should probably look professional. Take a look at the artist in our t-shirt a  
rectory and the Apparel graphics portfolio area. Many are expert artist at the t  
ques of Screen printing t-shirts. Using the Same screen printer next door that t  
gadesigner.com people use you can get Incredible t-shirt art and printing for th  
e price or less. In fact you can take the clip art you designed at t-shirts-R-us d  
nd Give it to an experienced t-shirt artist and see the difference of a little Cor  
aphics BLING. ( not to mention color and design theory) LOL. Anyway I starte  
parel Artist Directory, or should we say t-shirt illustrators Directory. To showca  
he many talents out there doing t-shirt designs day in and day out with Very litt  
rds other then watching Our art ship out on 200, 000 t-shirts to Walmart. Or see  
ple wearing them when we go to the mall. The forums are a place for t-shirt art  
lustrators to Shoot the breeze about everything from Clients from hell to Indust  
ends. And for Amateur artist to ask questions and learn about t-shirt art and al  
ocess involved. I've made it easy for any t-shirt artist to create news and articl  
ell as write their own t-shirt blog. My hope is that people will soon see that the  
ference between good graphics and graphics designed specifically for Imprintin  
nto a t-shirt or garment. A good t-shirt artist can take any art and make it Prod  
iendly for screen printing. Well If you wonder about my rambling Please take a  
t the second paragraph. I am trying to get key words like t-shirt artist Directory  
reen print graphic artist smooched into this text as much as possible. Besides  
-shirt artist not an journalist :-) Enjoy t-shirt-illustrator. Make it a place of ec  
on as well as resources for and about the art of t-shirt imaging. If you are an a  
teur or professional Please get a free link in The t-shirt artist Directory. Post y  
for all to see in the t-shirt artist Portfolio area. Write a blog about the rewards  
alls of doing t-shirt graphics for a living. Tshirtillustrator does not sell t-shirt  
o we advertise screen printing however there will be many links to these resour  
e are here primarily for the t-shirt artist.
